May 9, 2020

Dear William, Daniel, Catherine, Michael, Sarah, and Matthew,

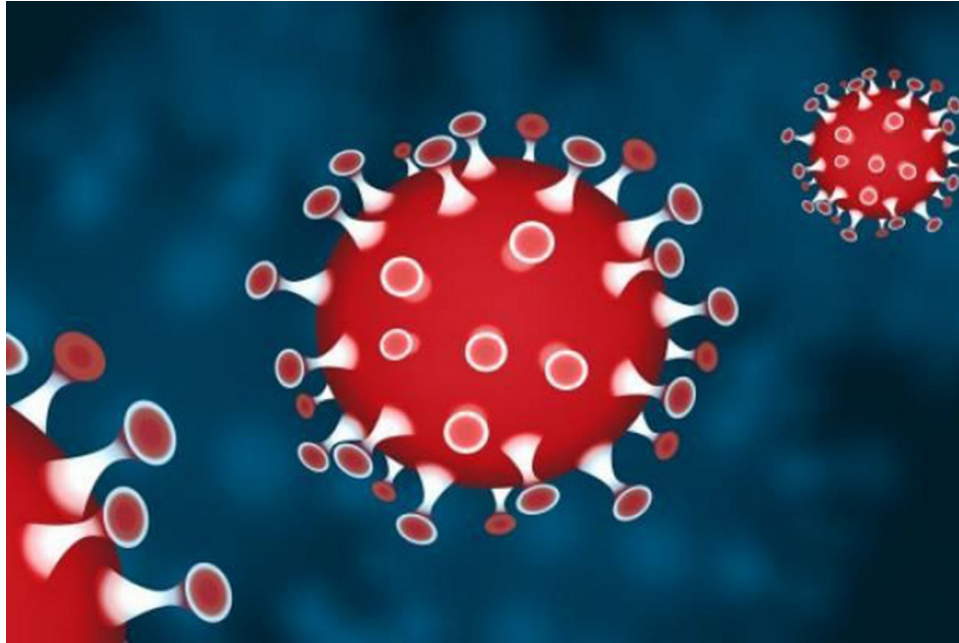

I love you very much. I hope that each of you, and your parents, are feeling well. Babcia and I are home – we do not go out much because of the pandemic that surrounds all of us.

A pandemic is a disease that exists over a whole country or the world – not everyone gets sick from it, but many people do get sick; some of them, get very seriously sick.

There are many types of pandemics – but, this particular pandemic that we are experiencing is called the COVID-19 Coronavirus.

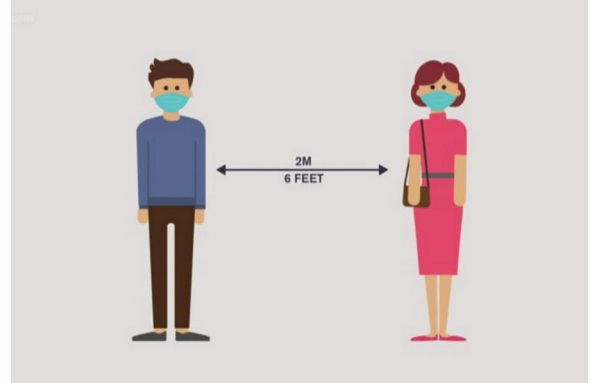

This is a picture of what the COVID-19 Coronavirus looks like under a powerful microscope:

If a person gets sick, we depend on real super-heroes to try to make them well again – these super-heroes are nurses, doctors, and other professionals who work in hospitals, and those who provide services (such as bus drivers and train conductors) that allow the doctors and nurses to travel from their homes to the hospitals where they are needed.

Most importantly, we (you and I, and everyone around us) can help in fighting this pandemic virus – we do this by washing our hands with soap, and by wearing face masks when we are outside our houses, and by keeping a distance of at least six feet from each other.

I will try to write to you more often; but, meanwhile, know that Babcia and I love you very much.

Love,

Dziadzius

*We love you !!!*

*Babcia and Dziadzius*
